

HOME SET AND DELIVERY

Historical green convergence

There are two primary differences between a New Old Green Modular (NOGM®) home and a conventional modular home. First, a NOGM home is based on a historically inspired design that evokes the spirit of the past while integrating all of the modern conveniences and amenities of the 21st century. Second, a NOGM home utilizes a whole-systems approach to design, incorporating the most stringent green standards, products and practices in the building industry. As a result, a NOGM home approaches *USGBC LEED for Home Platinum* certification directly out of the factory.

HISTORICALLY INSPIRED ... HISTORICALLY GREEN™

Welcome home.
